

Procurement

Seqwater is a critical part of the urban water supply chain in South East Queensland, delivering a safe, sustainable and valued bulk water supply for more than 3.6 million South East Queenslanders. We also supply water to around 1,200 irrigators and rural customers, supporting Queensland's agriculture and other industries.

We are always looking forward, planning for South East Queensland's water security future and investing in and operating a vast range of water supply assets.

Our operations extend from Gympie in the north, to the New South Wales border in the south, and in the coming years will expand beyond the base of the Toowoomba ranges with the construction of the Toowoomba to Warwick pipeline.

We are one of the largest land managers in South East Queensland and one of the most geographically diverse water businesses in Australia, with many sites comprising significant natural and cultural heritage values.

On behalf of our communities, we provide important catchment health management, access to diverse recreation opportunities, and provide important flood mitigation services that contribute to the liveability and prosperity of South East Queensland.

We are committed to ethical partnerships that enhance value, innovation, and safety in our supply chain, while aligning with the Queensland Procurement Policy to ensure accountability and sustainability.

To demonstrate our commitment, we will:

- balance costs, benefits, and fairness to deliver optimal procurement outcomes.
- create social, environmental, and economic value while ensuring compliance with regulations and supporting ESG goals.
- operate with integrity and transparency ensuring processes align with Seqwater's code of conduct, fostering public confidence.
- continually enhance procurement through capability development, innovation, and data-driven approaches.
- build strong supplier relationships and promotes open competition through early engagement.
- tailor procurement efforts to mitigate risk and align with Seqwater's strategic goals.

We will meet the commercial objectives of our Strategic Plan and comply with requirements set by relevant legislation, monitoring our procurement performance and position, seeking to continually improve our processes, performance and supply chain outcomes.

This Policy aligns to our values of care, respect, courage and integrity which supports everything we do at Seqwater.

This Policy applies to all our employees and contractors and to any person or organisation that acts for or represents us.
