REALITIES OF RAIN

WHAT IS REALITIES OF RAIN?

In South East Queensland, we can count on all types of rain - there's wedding day rain, long weekend rain, school holiday rain and just-polished-the-car rain.

In fact, the only rain we can't count on, is rain when we need it, where we need it.

That's why we're planning our water future - because we can't always count on the rain.

Realities of Rain is starting the conversation with South East Queensland communities about what we do when we can't always count on the rain.

WHY ARE WE TALKING ABOUT RAIN?

Up until now, we've relied on dams for our water supply – but these count on rain falling where and when we need it.

Dams store water - they don't make it. With the climate changing and our population growing, just having dams is not going to be enough for the future.

No one wants to see a South East Queensland without enough water to live, work and play the way we want to.

That's why we're planning now - and we want the community to be part of the plan we're creating.

WHAT CAN I DO?

We've created a Realities of Rain hub at **yourseqwater.com.au.**

- **Register for Realities of Rain e-news** and be the first to know when great videos, articles and interesting facts about how we're planning for our water future are added to the hub.

- **Check out the plan** - our guide to our Water Security Program gives you an overview of the plan and how it is tracking.

- **Book a presentation** - we're happy to come to you and talk all things Realities of Rain.

- **Take the water quiz** - we're keen to hear about what you know about water, what you don't know and what you'd like to know.

- **Be water wise** - while there are no conservation measures or water restrictions currently in place, there are some simple things we can do to be more water efficient around the home, school and work. Check out our tips at the Realities of Rain hub.

- **Start a conversation** with your kids, family and friends about water in your community. Do you know where your water comes from? How is it treated?
