Total number of tests in reporting period 2020-21			n	29070				

Average is calculated such that where a detection exists any less than values have been treated as zero. Where all values are less than, the average has been calculated from the less than figures and reported as less than which is effectively non-detected above LOR.

^a Parameter is included in Total Trihalomethanes (TTHM).

^b Parameter is included in Total Estimated Radiological dose value.

^c Parameter is operational or environmental.

^d Chlorine is assessed against health guideline only.

^e Guideline applies to Total for parameter.

ALOD = Assay limit of detection
