

Project Update

Seqwater is delivering the approximate 111 kilometre Toowoomba to Warwick Pipeline on behalf of the Queensland Government, to boost long-term water security in the Toowoomba and Southern Downs regions. The project will facilitate a permanent water supply offtake at the townships of Greenmount and Westbrook which will help support Toowoomba Regional Council's plans to supply drinking water to residents in the four towns of Cambooya, Greenmount, Nobby and Clifton.

The pipeline will also serve as a drought contingency water supply for residents within the Southern Downs Regional Council areas of Warwick, Allora, Yangan, and by carting to Stanthorpe and Killarney.

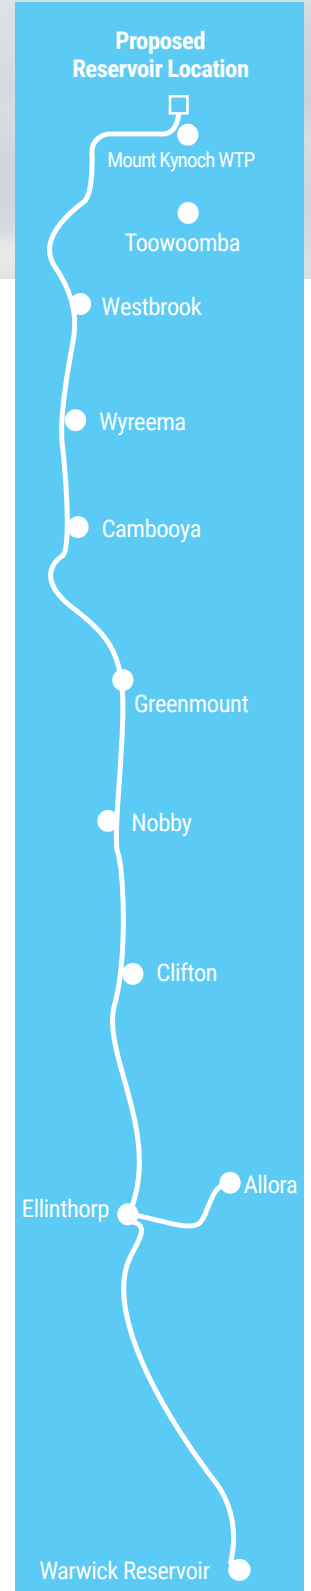

EPBC Act Assessment Continuing

We are continuing to progress Commonwealth approvals under the Environmental Protection and Biodiversity Conservation (EPBC) Act, available at the EPBC public portal. This is a part of our commitment to safeguard the environment and ensure compliance with all necessary regulations.

Our project team has been working with relevant departments and has completed site surveys to further assess potential environmental impacts associated with the project. These surveys focused on specific areas of ecological significance and help inform potential mitigation options for protected species, habitats, or ecosystems.

Seqwater is committed to ensuring that the project aligns with environmental standards. Our priority is to deliver the pipeline in an environmentally responsible manner while providing the region with long-term water security.

The project is subject to a Public Environment Report (PER) to be assessed by the Commonwealth Department of Climate Change, Energy, the Environment and Water (DCCEEW). Seqwater is continuing the development of the PER and will provide more information once it is available for public review.

Procurement and Design

Detailed design is progressing and reaching the final stages of completion, as the team continue to progress negotiations with impacted landowners, as well as with Toowoomba and Southern Downs Regional councils on easements. We have also been working with our shortlisted tenderers to identify risks and opportunities for delivery, ensuring the pipeline meets the highest standards of quality, safety, efficiency and reliability.

Construction contract award is planned for late 2025, and we are continuing to build the list of interested local contractors that will be provided to the Head Contractor once appointed. Thank you to those who have already registered.

Suppliers can still register interest in the project by signing up at our project webpage, which can be found by scanning the QR code below.

Invitation to Community Information Sessions

To ensure the community is kept up-to-date, we are excited to invite you to upcoming community information sessions to learn more about the project. These sessions will provide you with an opportunity to ask questions, and provide feedback directly to our team.

Drop by any time during these sessions:

- **9:00am - 12:00pm, Tuesday 29 July** - Allora Community Hall, 55 Herbert Street
- **3:00pm - 5:00pm, Tuesday 29 July** - Warwick Rose City Shoppingworld, 81 Palmerin Street (outside Woolworths)
- **9:00am - 12:00pm, Tuesday 5 August** - Greenmount Returned Soldiers Memorial Hall, 11 Ramsay Street
- **3:00pm - 5:00pm, Tuesday 5 August** - Highfields Village Shopping Centre, 66 Highfields Road (outside the pharmacy)

Your feedback is important as we move forward with the project.

Contact Us

You can sign up to the project e-newsletter by filling out your details at the QR code, or email projectinfo@seqwater.com.au and ask to be added to the T2W project update list.

For more details, visit our project webpage or contact us anytime, we're here to help.
