

# North Pine Dam Staged Strengthening Project

We're making our largest investment in our dams to keep water safe and reliable for everyone in South East Queensland.

As part of this initiative, the North Pine Dam Improvement and Staged Strengthening Projects are being carried out to bring the dam up to modern engineering standards, ensuring it continues to provide water security for generations to come.

Seqwater is proud to partner with SRG Global Civil Pty Ltd as the major construction contractor for the Staged Strengthening project.

We acknowledge construction may cause disruption, and we appreciate the community's patience and understanding as we work together to enhance our region's water infrastructure.

## Standard Work Hours

During construction, the project team will complete most work during the approved working hours to reduce impacts to the community.

- Monday to Saturday - 6:00am to 6:00pm

## Out of Hours Work

Due to the nature of the construction, some work activities are time critical and must be carried out continuously or outside of the approved standard hours for safety and construction reasons. This includes night and weekend work.

The project team will notify and engage with potentially impacted stakeholders in advance of any out of hours works. The information provided to residents will include work activities, staging, durations, equipment used and mitigation measures.

Although mitigation measures will be in place to reduce impacts, activity may be disruptive to some residents in close proximity. The appropriate equipment will be used to ensure the work is completed safely and as quickly as possible.

We understand out of hours work may raise concerns, and we are committed to providing regular updates and support to ensure residents are informed. The project team thanks you in advance for your patience and understanding throughout this important project.
